

# Blue Light solutions

**Workspace Technology delivers secure and resilient Data Centre Infrastructure and Mission Critical Power for police forces across the UK. We understand that the use of effective and reliable data is becoming ever more crucial in helping you to target resources to effectively protect civilians and property against a multitude of threats.**

Facing financial pressures to lower the annual I.T. bill, new innovations and efficiencies need to be sought to provide public purse savings. With police forces across the UK faced with expensive, fragmented and outdated systems it is resulting in those that are responsible for data centre management, now looking for new ways in which to make savings through the implementation of innovative technology solutions.

Our mission critical data centre solutions will not only assist you in driving efficiencies but will also provide you with a reliable, quality and world-class facility.

## Do you have...

### Outdated systems?

**Repurposing** - We can transform your old outdated data centre into a fit for purpose solution by repurposing the space. Alternatively, we can install one of our prefabricated data centre solutions that offers construction off-site and can be deployed with minimal disruption to your operations.

### Immediate access requirement?

**Always Open** - On-premise infrastructure will provide you with instant access, availability and security. Operationally, it will form the platform to support your local IT-compute including bandwidth intensive content and latency sensitive applications.

### No time for downtime?

**Switched on 24/7** - Utilising the latest UPS and Genset technology our solutions have multi-layered resilience built-in to ensure permanent availability of your infrastructure.

### Limited budget?

**Funding Options** - To help spread the cost of such a significant investment we can provide a range of leasing options to assist with the funding of your project. An ideal solution for meeting budget targets and maintaining control over your finances.

## Why choose us...

- Our in-house design team provides multi award-winning highly efficient innovative data centre solutions to emergency services across the UK, helping to remove the high cost associated with the employment of consultants.
- We provide a complete turnkey installation delivery service removing the layers of subcontractor margin. We are CHAS and SAFE Contractor Principal and Subcontractor accredited.
- We deliver the ultimate in high efficiency data centre infrastructure with innovative solutions based on robust engineering principles.
- We hold longstanding and accredited partnerships with many of the world's largest data centre technology specialists.
- These relationships enable us to provide you with first-class technology at a competitive rate.
- We possess proven successful experience of working with UK police forces and security services.

## Standards & Accreditations

# Added Value for the Blue Light Sector

## Sustainability

**The UK Governments' 'Strategy for Sustainable Construction' is embedded within our business practices and captured within our EcoDesign™ strategy.**

Designed to significantly contribute towards delivering sustainable construction and represents our commitment to helping you to reduce your carbon footprint through the deployment of energy efficient technology and design.

## Quality Assurance

**We only use or employ manufacturers and suppliers with recognised data centre and critical infrastructure equipment credentials. All products conform to the relevant British (EN) Standards and also carry CE, WEEE, RoHS markings and where applicable CPNI Approved.**

We possess a wealth of knowledge of delivering to emergency services and to locations of high security. We are supported by our ex-military personnel who have detailed knowledge of the requirements, standards and regulations in the deployment of the data centre infrastructure for secure applications.

## Funding Support

**We can assist emergency services with the funding of your project and offer an array of options to help spread the cost and to measure your ROI:**

- Performance Contracting
- Lease & Contract Hire
- Grant Support

## Security

**We operate a security culture based upon a defined set of operating processes and procedures, the practice of which minimises the risks of our activities being subverted, or targeted for cyber or physical attack.**

Our security access process for your data centre infrastructure can utilise a dual control system as well as CCTV monitoring. By integrating different types of security you are increasing your level of defence.

## Health & Safety

**Ensuring that your staff and our employees are able to undertake their work in a healthy and safe manner is our number one goal.**

Our 'Don't Walk By' policy contributes significantly to our zero accident rate. Every individual employed by us, either directly or as a subcontractor, is responsible and accountable not only to report potential hazards but to ensure that action is taken to remedy them.

## Pentagon 360° Service

**Delivering:**

- Consultancy
- Design
- Build
- Maintenance
- Support

100% in-house. Our unique holistic approach offers improved communication, economies of scale, and complete peace of mind ensuring that your project is in safe hands during the lifetime of your data centre infrastructure.
