

Education solutions

The UK is home to world-class universities providing outstanding teaching and research facilities. Higher Education plays a pivotal role in the development and vitality of UK economic growth, and the continued growth and development of the HE Sector is therefore of paramount importance.

Increasingly HE providers are being tasked to do more with less, adapting to the need to operate under tighter budgets, whilst still providing the first-class facilities required by the Government, students, teaching professionals and the public.

A third of Workspace Technology's business is within the Education Sector. We have delivered data centre solutions across multiple locations throughout the UK, with award-winning installations providing next generation energy efficient resilient infrastructure. By opting to choose us as your delivery partner we will add value throughout our engagement with you, ensuring you provide world-class facilities that exceed the expectations of all.

Do you have...

Sustainability targets?

Efficiency - Energy efficiency technology sits at the core of our solutions and will fulfil your obligations regarding driving down CO₂ emissions and delivering energy saving initiatives. We integrate the use of EcoDesign™ into our design and build process to deliver 'green' data centre infrastructure, creating an eco-friendly image to assist you in meeting your sustainability targets.

Timely tendering process?

Ease of Procurement - We are an NEUPC Framework Partner for the provision of Data Centre Design & Build and associated services, thus eliminating the need to go through a PQQ process, saving you time and money.

Limited budget?

Funding Assistance - A complete range of leasing options are available, as well as support to help you with the provision of information relating to financial assistance which is currently available through Government schemes, including Salix and Carbon Trust.

Space restrictions?

Modular Solutions - Our prefabricated modular data centre solution can be constructed off-site, and by eliminating the need for traditional 'bricks and mortar' buildings it typically reduces overall capital expenditure by over 40%.

Why choose us...

- We have a wealth of experience of delivering award-winning projects within the Education sector. We will provide you with the highest quality facilities to match budget expectations, maximise ongoing efficiencies and accelerate ROI.
- We believe successful projects are born out of a collaborative partnership approach. All our manufacturing partners provide world-class proven data centre solutions.
- We are on the NEUPC Framework Partner for the provision of Data Centre Design & Build and associated services to assist you in maximising third party expenditure and resources.
- Energy efficiency sits at the core of our solutions and will fulfill the obligations Education providers hold with regard to driving down CO₂ emissions and accelerate ROI.

Standards & Accreditations

Added Value for the Education Sector

Sustainability

Our EcoDesign™ strategy saves millions of kilowatt hours of energy and will continue to do so for years to come. Based on five fundamental principles it helps clients to reduce their carbon footprint through the deployment of energy efficient technology and design.

As we are an ISO 14001 certified company, we will ensure that we undertake a full review of the proposed site to identify any environmental risks, as we are fully committed to fulfilling our environmental duties in a responsible manner.

Quality Assurance

We undertook a rigorous and detailed pre-qualification process that covered all commercial and technical aspects of the framework subject matter to enable us to be on the NEUPC Framework.

This ensures that you benefit from shortened project timescales, reduced procurement costs and you are guaranteed technical competence and experience.

We ensure that all our construction work meets with standard building regulations.

Funding Support

We assist education providers with the funding of your project and offer an array of options to help spread the cost and to measure your ROI:

- Performance Contracting
- Lease & Contract Hire
- Grant Support

Continuity

To ensure that the learning environment is unaffected, our team, in conjunction with your personnel, will develop a plan to manage constraints and risks prior to work commencing.

To enable students and teaching staff to focus on the positive outcomes, all handovers and/or disruptive works are planned to fall outside the key identified academic periods, wherever possible.

Where data centre work involves refurbishment of existing facilities, our plan will ensure the integrity and resilience of existing infrastructure, maintaining continuity of uptime.

Health & Safety

Student welfare and safety is of paramount importance both during and after project completion. Our zero accident target has been achieved due to our holistic approach to Health & Safety.

The process begins at the design stage following best practices, CDM 2007, then through the installation phase utilising a range of procedures inline with methodologies including ISO 9001, PMBOK and Prince2.

Our 'Don't Walk By' policy ensures that every individual employed by us is responsible and accountable to report and ensure action is taken to remedy any potential hazards.

Pentagon 360° Service

Delivering:

- Consultancy
- Design
- Build
- Maintenance
- Support

100% in-house. Our unique holistic approach offers improved communication, economies of scale, and complete peace of mind ensuring that your project is in safe hands during the lifetime of your data centre infrastructure.
