

# Power & Cooling Disaster Recovery Contingency Planning

**Every business is vulnerable to incidents that can prevent normal operations. Unplanned incidents that effect power and cooling will have a direct impact on your ability to continue operating your data centre facility.**

Power & Cooling Disaster Recovery Contingency Planning puts you in control of the situation with a pre-audited and pre-planned set of events and actions that will take place under DR situations.

## What is involved?

### Site DR Audit - to include:

- Comprehensive Site Check List Completed.
- Equipment Requirements & Type Assessed.
- Advice on and Selection of Connectors.
- Advice and Agreement on Equipment Placement.
- Detailed Plan of Equipment Placement on Site.
- Photograph of Site for Equipment Placement.
- Contact Details Listed.
- Logistics Survey Carried Out and Plan Drawn Up.

### Contingency Plan Details - to include:

- Details of the Sequence of Events in the event of a Power and/or Cooling Failure.
- All relevant Plans, Connection & Pipework Arrangements and Site Contacts.
- Contact details for our National Rental Centre and Service Team.

### 12 Months Contracted 24x365 DR Invocation Availability - to include:

- Contracted Access the National Rental Centre Staffed 24/7, 365 days a year.
- Invocation with 4 to 8 hours (actual SLA to be confirmed following site audit).
- Equipment Hire Rate (see Invocation Prices) Fixed for 12 months.

## Benefits...

Disasters that effect power or cooling systems cause expensive business downtime.

Whilst it may not be possible to avoid the disaster by implementing a preplanned Power and/or Cooling Disaster Recovery Contingency Plan this will help shield the business from its effects.

- Provide business continuity.
- Provide peace of mind for you and your customers.

By invoking the pre-prepared DR Plan you can ensure that your power and/or cooling can be re-established following a disaster, typically with a 4 to 6 hour window giving you the reassurance that your business can continue to trade.

## Frequency...

Annual Rolling Plan - reviewed on a yearly basis.

## Other Services

### Data Centre Solutions

When it comes to data centre design build and management, Workspace Technology delivers award-winning solutions for organisations across the UK. We have simplified the architecture from which we design and build data centre infrastructure and associated technology to support client availability, agility, energy efficiency and business needs.

Whether you require a state-of-the-art on-premise data centre build or if space and accessibility is a challenge a Modular or Micro data centre, you can be assured that Workspace Technology will deliver a quality, agile and sustainable solution.

### Technical Prefabricated Buildings

Workspace Technology provides a comprehensive range of prefabricated modular and mobile buildings engineered for flexible, high-performance use across diverse industries. Our solutions include DataCube™ mobile data centres with integrated cooling, fire suppression, and IT infrastructure; SecureCube® high-security SCIFs and secure buildings with advanced physical, acoustic, and RF protection; and TelcoCube™ telecommunications cabins supporting fibre repeater stations, 5G base stations, and a wide range of other telecoms applications. We also offer prefabricated power and cooling modules for scalable technical infrastructure, and bespoke prefabricated solutions tailored to meet specific client requirements.

### Maintenance & Support Services

We offer a wide range of services to support your data centre infrastructure to suit your business's demands. We are experienced and qualified to effectively support all your data centre equipment including; air-conditioning systems, chilled water systems, UPS, generators, fire suppression systems, environmental monitoring technology, DCIM and associated mission critical infrastructure.
