

5 Year Periodic Electrical Testing

Workspace Technology provides approved Electricians to attend site to undertake Electrical Inspections, Testing and Reporting on the condition of your electrical infrastructure.

The 5 Year Periodic Test is designed to check the condition of the electrics against the current UK standard for the safety of electrical installations, BS 7671 - Requirements for Electrical Installations (IET Wiring Regulations).

What is involved?

Works will be undertaken by experienced Electrical Engineers.

Inspection checks to include:

- Adequacy of earthing & bonding, suitability & condition of the switchgear.
- The serviceability of fittings, identify items that may need replacing.
- The type of wiring, its condition and adequacy of identification and notices.
- Extent of wear and tear, damage or other deterioration.
- Changes in use of the premises that have led to, or may lead to, unsafe conditions.

Testing to include:

- Testing in accordance with the latest BS 7671 electrical regulations.
- 100% Test of all circuits in the electrical installation.

Report to include:

- Electrical Installation Condition Report (EICR).
- Non-compliance of Faults will be coded based on risk.
- Non-compliance that require immediate attention will be highlighted.
- Recommendations to improve the installation.

Benefits.....

- Ensures Electrical Infrastructure is on good condition.
- Fulfills Building Insurance Regulations.
- Reduces Operation Risk of Power Failure.

Relevant Laws.....

- Management of Health & Safety Work Regulations 1999.
- Health & Safety at Work Act 1974.
- Provision & Use of Work Equipment Regulations 1998.
- Electricity at Work Regulations 1989.
- Workplace (H&S & Welfare) Regulations 1992.

Frequency:

Every 5 years or on a 'rolling' basis - Part infrastructure per year.

Data Centre Solutions

When it comes to data centre design build and management, Workspace Technology delivers award-winning solutions for organisations across the UK. We have simplified the architecture from which we design and build data centre infrastructure and associated technology to support client availability, agility, energy efficiency and business needs.

Whether you require a state-of-the-art on-premise data centre build or if space and accessibility is a challenge a Modular or Micro data centre, you can be assured that Workspace Technology will deliver a quality, agile and sustainable solution.

Rack Colocation Hosting

Workspace Technology provides premium colocation rack space that delivers optimum energy efficiency, resilience, security, flexibility and is designed specifically to host your server equipment.

Located in Sutton Coldfield, just 12 miles from central Birmingham and 15 minutes from the M6 and M42 motorway, in the heart of the West Midlands.

Workspace Technology's colocation data centre is ideally positioned to support the growing demand for cloud-based computing services, primary data centre backup and disaster recovery applications for organisations and systems integrators within the Birmingham, West Midlands and East Midlands region.

Maintenance & Support Services

We offer a wide range of services to support your data centre infrastructure to suit your business's demands. We are experienced and qualified to effectively support all your data centre equipment including; air-conditioning systems, chilled water systems, UPS, generators, fire suppression systems, environmental monitoring technology, DCIM and associated mission critical infrastructure.
