

# Prefabricated Modular Data Centres by Workspace Technology...

...offer a unique range of flexible and efficient server ready  
Prefabricated Data Centres's, Server and Comms Rooms

## Features

- **Locate Anywhere on Campus** – Pre-engineered and ready to use
- Free up valuable teaching space or create a new facility with ease
- **Self-Contained** – Racks, Cooling, Fire Suppression, UPS and Power Distribution
- **Secure** – Exceeds MoD and Security Forces Standards
- High Performance Computing (HPC) & VR Emulator capable for ultra demanding compute workloads
- **Managed Service** – Ensuring the facility is maintained and monitored

## Benefits

**Rapid Deployment** – Minimal on-site preparation needed for immediate use

**Scalable** – Modular 'right size' configuration to grow in line with compute requirements

**Energy Efficient** – Reducing carbon emissions through the effective use of technology

**Economically Efficient** – Typically 40% lower costs compared to traditional construction

**Research Computing** – Intensive compute operations to support Bioinformatics, CFD, FEM and data science & analytics

## Applications

Latency Sensitive Applications

Multi-Cloud

Distributed & Edge Networks

On Premises Primary/DR Datacentre

High Performance Computing

**Designed & Built in the UK**  
Built for Business

Our prefabricated technical buildings are designed, fabricated, and built in the UK ensuring a high proportion of value is retained within the UK economy.
